1. Claims 1-25 are allowed.
2. The following is an examiner's statement of reasons for allowance: The certain features of the claimed invention are not taught or fairly suggested by the prior art. Specifically, the prior art fails to show an apparatus for detecting gear features wherein a thresholding module operable to detect a second difference between the third signal and the reference signal, and responsively adjust the first signal as a function of the second difference when the second difference falls below a given threshold and by a predetermined amount when the second difference satisfies the given threshold and an output module operable to receive the reference signal and the second signal, and responsively produce an output signal as a function of a first and reference signals. Because none of the prior art teaches or suggests this element, this feature, taken together with the other limitations of the claims renders the claims allowable over the prior art.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
